

GINGER

GROW GUIDE

INDIRECT

HEAVY

STEP 1

IN A LARGE POT (IDEALLY 18 INCHES ACROSS), PLANT SEVERAL RHIZOMES OR LEFTOVER PIECES OF GINGER. ANY GINGER WILL DO HERE, ALTHOUGH ITS PREFERABLE TO BUY FROM YOUR LOCAL ORGANIC MARKET.

STEP 2

PLANT EACH PIECE IN A WELL-DRAINING POTTING MIX. IN AN 18 INCH POT, UP TO FOUR DECENT SIZED RHIZOMES CAN BE SNUGGLED TOGETHER.

STEP 3

COVER THE POT WITH A PLASTIC BAG OR CLING FILM, TO KEEP TEMPERATURES AND HUMIDITY HIGH.

STEP 4

MIST THE SURFACE OF THE SOIL TO KEEP IT MOIST UNTIL GREEN SHOOTS START TO BURST THROUGH THEIR EARTHY CEILING, CLIMBING INTO THE SKY. AT THIS POINT REMOVE THE PLASTIC COVERING.
